Re: Swine Flu outbreak: situation in Costa Rica

Greetings to all,

As a result of the outbreak of swine flu that originated in Mexico and that has reached our country today we would like to inform you that we are aware of the situation and that the Management of United World College Costa Rica is already implementing a series of preventive measures as a joint effort of our medical staff with the different areas of the School, particularly the academic and Residential Life areas. Moreover we are in constant communication with the Costa Rican Ministry of Health and we are receiving their official communiqués and recommendations to implement immediately after they are received.

We will let you know of any new information in regards to this issue. For now we would like to ask you for your cooperation on this matter so that all actions taken by our School are followed accordingly.

- The Management.
